However, toner, drum CD or manual are not included. Make Supersized seem small. Get images that. great experience on their minds after all said and done. Give your business documents a burst of life by adding bright, vivid color. You can share the 3110cn across your office network and take advantage of color printing from any connected system. Memory 1GB MAX Resolution Color 600x600DPI Form Factor Stationary Data Link Protocol Fast Ethernet, Ethernet FIRST Page Out Time 16sec. Printer is sturdy and can handle thicker paper types without issue. Fairly cheap cost per page when compared to other color lasers. Toner Cartridges last a loong time. several thousand pages each. Takes a few minutes to unpack and set up but computer configuration was easy. Printer application allows for TONS of customizations. This is a very handy way to quickly touchup the pages being printed. Two issues. Also. The print spooler process on the computer can sometimes crash. You have to reboot the computer before anything can be printed again. This happens mostly after resuming from hibernation. Print quality is average to good. More than adequate for most office work. Its reliable and doesn't require much attention. The only down side is the cost a full set of toner cartridges exceeds the cost of a new printer with the same toner set in it. <http://3-peaksleadership.com/admin/uploads/allison-750-manual.xml>

That said it's more economical to run than most other color lasers in this price range even assuming you just buy a new one when the cartridges are all empty. Our office just bought the 3rd one of these. Pros It only took a few seconds to send out the first page. On my old Minolta it would take 15 minutes to print the same file. I have not tried it on photo quality paper. Cons It took 2 people to get it up on the desk, however, keep in mind, I am not the strongest or biggest person. I pulled all the color tabs off before I installed the cartridge, which leaves part of the toner exposed. The last piece is supposed to be removed once it is in place. Otherwise, you end up with ink on your hands. It wasn't clearly marked about removing the final tab. Unknown Overall, this is an excellent printer. It is perfect for the small business or home office. The printing times are fast and the quality is clear and crisp. This purchase was made to replace my old printer which was the same make and model. I felt that I was taking a chance buying a ten year old printer that had never been used, but it started up right away and has been working perfectly. Even with paying quite a bit for packing and shipping, it was cheaper than buying a new one. Great quality printer for the price. Print speed is more than adequate for the needs of my small business. Print quality for color documents is very nice and you cannot beat Dell's service. I am using this for all of my printed collateral, including business cards so it is saving me a bundle in printing costs with professional looking results. The printer is very heavy about 85 pounds, which made setting it up out of the box a bit cumbersome for one person. Verisign.
