Egy baratom megkert, hogy talaljak vagy gyartsak egy tapegyseget a Bose dokkolojahoz. Sajnos az eredetiket aranyarban adjak, igy gyartanom kell egyet. Talatam is egy elegans kis 4 pines csatit, de fennakadtam az eredeti csatlakozo labkiosztasan. Talaltam egy rajzot de nem tudom eldönteni, hogy a kabelen levot abrazolja, vagy a dokkoloban levot. Basszus vegfoka 23mp mulva megfut vagy pozitivba vagy negativba ha nincs a hangszoro rarakva, hangszoroval azonnal letilt, amikor a kimeneten eljut DC 4Vig a vedelem lekapcsolja relevel az erositot. Mikor a MUTE hibát kerestem, volt olyan eset is, hogy nem futott meg a kimenet es szolt a basszus rendesen, de ujboli bekapcsolaskor ha nem halkitottam le a potit akkor kikapcsolt a rele, ha lehalkitottam akkor jo lett, de nagyon susogott, arra hasonlitott mint amikor FM radio nincs az allomason, van egy kozos mute tranzisztor az kapcsolja az osszes tobbit, ha azt kiszedtem akkor is megmaradt a susogas, szerintem visszafele jott valamelyik oldalrol ezert szedtem ki mindegyik oldalrol a tranzisztorokat, nem akartam bajlodni vele, hogy honnet jon a susosgas vissza.http://stephankeppel.com/userfiles/colt-2_4-workshop-manual.xml

Setup was easy. All I had to do was plug it into the Bose Link port. Since this external adapter can only pair one Bluetooth device at a time, I had to turn the Bose on, then press AUX to cycle it to Bluetooth. Once there, I pressed the 5 button to make it discoverable. Since it remembers the last device I paired, I did not have to make it discoverable again.

However, if I wanted to pair a new device, I had to press the 6 key until the unit beeped about 10 seconds and then it would clear the Bluetooth memory and become discoverable again. One negative I did see with the external adapter is that the volume is about half that with Bluetooth enabled. What I mean by this is that a volume of 30 on the radio sounds like 15 when paired with Bluetooth. I found that I had to double the volume when using this adapter. In summary, it works even if it is a bit cumbersome to get use to and the volume requires an increase. I can not believe that a company that has a good reputation and a dedication to technical expertise would sell a product that is completely obsolete in less than two years. NO OPTIONS My options is to abandon Bose products and seek other companies to patronize. DO NOT BUY THIS IF YOU HAVE AN iPhone 7!!! I had my iPhone, my computers both desktop and laptop and tablet up and running in no time. Just plug the Adapter into your Wave II or III system note read the instructions carefully that comes with the unit, the Wave II and III systems set up slightly differently. The Adapter doesn't have a power chord, it gets its power from the unit. That in itself is great and no need for yet another device plugged into your outlets. All of my bluetooth enabled devices discovered the Bose Adapter easily. The Adapter memorizes 6 device settings. more than enough for what I needed. I probably didn't have to, but a few folks who purchased the bluetooth adapter mentioned that they had a few problems with installation on their computers with Win 7 on their reviews. As far as my tablet, my Toshiba Thrive recognized it immediately and had that operating in less than a minute. I have the Bose Wave III system. When I heard Pandora, Spotify and other music sites from my computers and my iTunes from my iPhone over the those Bose speakers, I was blown away. The sound is as incredible as the CDs that I play on the Wave III system itself.

You too, will enjoy the great Bose sound you get from your devices compared to the inferior speaker systems on your devices. Finally, one more tip for the nontechie people like myself If playing music through your computer, you will need to change a couple of settings on the computer itself. First, make sure that the computer setting is set for bluetooth go to control panel, systems and security, then change to allow bluetooth devices. The other is make the Bose system as your main speaker output for your computer. To do that, go to control panel, then devices and printers, then change the speaker setting on your computer to the Bose system instead of the speaker default. If you don't change that setting, it won't play on your Bose. To do that in Windows 7, simply go to your

control panel, click hardware and sound, then manage audio devices. You can change your playback device to the Bose system there. If you love your Bose system as much as I do, why just hear your CDs and the radio on them when you can use the Adapter to connect up to 6 of your audio bluetooth devices to it and enjoy that great Bose sound on all of them! Ridiculous, especially considering the price. It plugs into the BoseLink connection in the back and that's the only connection you need. Syncs with our MacBooks, iPads and iPhones perfectly. Takes a couple of seconds and off you go. Sound is good. The sound level is a little lower so you will have to go up in volume, but the sound quality is great. Easy set up. We've had no issues with range. We usually don't get further than 15-20 so I will vouch for that range of distance. It's pretty sleek and doesn't stand out too much. A little high in price but you won't have to connect it to a power source and it's reliable. She is now streaming from her iPad to her Bose Wave Radio III. Easy install, and simple bluetooth discovery and connectivity. This should have been included with the original system. Great sound out of such a small unit.

The bluetooth just adds to the function, awesome. One issue is it uses the same connection port as the multi-CD Changer. If you have the CD changer, you will have to disconnect the changer and connect the bluetooth adapter before you can use it. It IS Our Guiding Principle Add Site to your Favorites Other sites we host Phase Linear History Vintage Technics Database We sponsor two free Yahoo Audio Groups We are meticulous and give genuine best efforts to produce clean, well-constructed manuals for you. A side-by-side comparison of our reproduction manuals with those from many other vendors will usually reveal an overall better appearance, construction, and print quality. Sometimes strikingly so. Our Customer Comments page is a fraction of what we receive from real customers and electronics technicians. The vast majority of our printed reproduction manuals are Very Good to Excellent on our Guaranteed Quality Ratings scale. But every single item is not and we refuse to give a false impression that they are. We want you to see a detailed description and individually assigned quality rating before you purchase. This time-consuming extra service is almost never provided by our competitors. Customer complaints are nearly zero, perhaps one per 500-1000 sales. We believe that virtually none of our competitors could truthfully make a similar claim. We are a USA based family business operating old-school style.

That means real people trying to serve you as if we were a walk-in store in your local neighborhood. We always combine shipping on multiple item orders and do not rip you off on shipping charges.
