Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. See All Buying Options Add to Wish List Disabling it will result in some disabled or missing features. You can still see all customer reviews for the product. I have just tested the color copy feature today for the first time, and I am pleased. It is fast and sharp. You can fax multiple pages without having to separate pages or have pages go through together as was the case with a fax machine that I owned for only a few weeks due to its poor feeding problem. I dont know about color faxes, so Im not sure if I would ever use that feature. Its just a nice compact desktop way of having fax and copying options virtually at your fingertips. The unit is well designed and appears to be well built. I use a fax service from innoport.com for incoming faxes that are delivered to my email. Since I wrote this, I have had an a vertical black line on all incoming faxes, and black and white and color copies. I am going to attempt to clean the scanner glass per the instructions of technical support. The other frustrating thing is that the bar that rolls the paper through the machine is very tight, so it can get jammed at times, but on the plus side, this machine feeds sheets of paper usually fairly well. A mixed bag sorry I cant change my review to 3.5 stars. The color copy quality aside from the vertical line is very good and rivals that of an inkjet printer. The features for enlarging, reducing and changing tone and contrast

are also very intuitive and helpful. It also is a very fast copier in black mode. The one I removed I only put in last week, and it sure looks full of ink to me. <http://hkonline.com.hk/gx/guoxing/Uploads/3ware-9500s-manual.xml>

This is ridiculous and I have spent a lot of money more than the fax machine is worth on COLOR ink when I am only receiving black and white faxes. It just wont print when it THINKS it needs more color ink. And by the way, I couldnt find any help on the Brother site. It seems that this machine is no longer in their pulldown list. I did, however, find many unhappy reviews on the web with others having the same problems. Please try again later. Altwegg 1.0 out of 5 stars And when any cartridge is empty, the entire machine stops working. You have to buy new color cartidges even if you never use them, because the machine makes sure theyre used up over a few months. I bought this machine because I thought the consumables would be appropriate. Now Im off to the supply store to buy Cyan and Magenta just so I can print out a black and white fax. Grr!!!! Please try again later. Please try again later. Mike J 2.0 out of 5 stars It will not fuction unless all of the ink cartriges are full. Until Brother can improve the ink system, LEAVE THIS ITEM ON THE SHELF! Please try again later. Please try again later. E. Donald 4.0 out of 5 stars Please try again later. Please try again later. Hans 5.0 out of 5 stars Its easy to use, the quality and speed are good, and the additional USB connectivity is very useful. Since I refill all my printer cartridges rather than replace them, I found the cartridges on this machine easy to refill. Id recommend this machine. Please try again later. Please try again later. Douglas Macdonald 1.

I traded it in for a Sharp for the same price and have no problems now. Avoid THIS particular fax machine like the plague. Please try again later. Please try again later. Bruno Rene 4.0 out of 5 stars I am very pleased with the easy functions. once you follow the directions the machine has a memory. I love the fact that it also makes copies.
